

Timur Kadyrbekov

Frontend / Fullstack Developer â€” Vue.js Ecosystem

+996-558-841-717 | github.com/spelingbee | linkedin.com/in/timurkadyrbekov | Bishkek, Kyrgyzstan (open to remote)

SUMMARY

Frontend/fullstack developer with 6 years shipping production Vue.js and Nuxt applications for B2B clients in food-delivery, retail, and marketplace sectors. Comfortable owning a feature end-to-end â€” from PostgreSQL schema and NestJS APIs through to a polished, accessible UI. Track record of measurable performance wins, including page-load times cut by ~30%, bundle size cut by ~20%, and mobile retention up ~20%. Currently deepening systems architecture knowledge and exploring Rust for backend, performance-critical work.

CORE SKILLS

Frontend: Vue 2/3, Nuxt 2/3, Composition API, TypeScript, JavaScript (ES6+), Pinia, Vuex, Responsive & accessible UI, vee-validate.

Backend: NestJS, Node.js, REST API design, Authentication & authorization.

Database: PostgreSQL, Schema design, Query optimization, SQL-injection prevention.

Architecture & Practices: SPA / SSR / MPA, Scalable frontend architecture, Performance optimization, Clean code practices, Git, CI/CD, Docker (basic).

Bots & Integrations: Modular Telegram bot frameworks, Payment gateway integrations, OpenAI API integration.

PROFESSIONAL EXPERIENCE

Combo Agency â€” combo.agency

Frontend Developer | Apr 2023 â€” Present • 3 yr 3 mo

Led UI development and full redesigns for 3+ B2B clients in food-delivery and retail, including berrywoodfamily.ru, bellini.delivery, and 7+ other projects, improving mobile retention by ~20%. Built filtering, sorting, and search features integrated with REST APIs, cutting query latency by ~15%. Proposed and implemented frontend architecture improvements that reduced technical debt and accelerated delivery by ~10%.

Vignette ID â€” vignette.id

Fullstack Developer | Jul 2021 â€” Mar 2023 • 1 yr 9 mo

Built core product features end-to-end: authentication, user profiles, marketplace, and a custom admin panel with Telegram login. Implemented profit-calculation logic and analytics dashboards, cutting manual reporting effort by ~40%. Redesigned the database schema and backend structure, improving query performance by ~25% and closing SQL-injection vulnerabilities. Refactored frontend architecture, reducing bundle size by ~20% and page load time by ~30%.

Freelance Projects

Frontend Developer | Jul 2020 â€” Jul 2021 • 1 yr

Delivered Vue.js/Nuxt projects end-to-end for local clients, from architecture through deployment. Explored modular, service-based API layer patterns ahead of moving into team-based development.

ADDITIONAL PROJECTS

Designed and built Telegram bots for e-commerce and automation, including a reusable framework for generating modular bots and OpenAI-powered conversational assistants, with integrated payment systems.
